CSIS1664 - 2024

Practical 3: Basic HTML for the "LevelUp" website

Due date: Wednesday, 13 August 2025

Submission deadlines: (No late submissions will be accepted.)

- Group A at 16:55
- Group B at 19:55

Instructions:

- Each one of your web pages should look identical to the screen captures provided. Note that all screen captures were taken using the latest version of Microsoft Edge.
- Make sure that all your web pages conform to the latest HTML standard.
- You are **not** required to validate your pages using the W3C HTML validator. Validating your pages will, however, ensure that you submit files with fewer errors.
- Include your initials, surname, student number as well as the assignment number and filename as comments inside each `.html` file.
- Always make use of relative file referencing.

Background Information

For this assignment, you are going to start with a new set of files for the "LevelUp" website. You will be required to add HTML structure and content for the website, and update your personal index page.

Please read the specifications carefully and make sure that you follow all the steps specified in this document exactly.

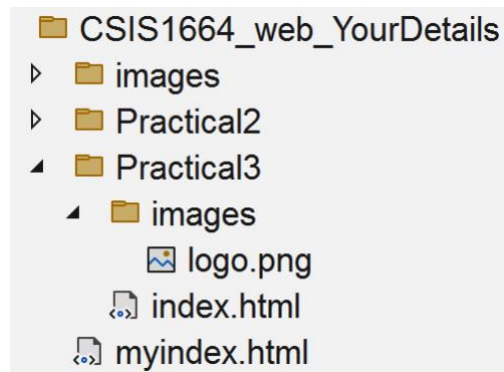

Step 1 - Preparation

Before you can start with this assignment, you will need to do the following preparations:

- 1.1** On your computer, locate the **CSIS1664_web_YourSurnameYourInitials** folder that you worked on in Practical 2.
(**Note:** From now on this folder will be referred to as **your CSIS1664_web** folder.)
- 1.2** Make sure that you have corrected all your mistakes from Practical 2.
- 1.3** Create a folder named **Practical3** inside your **CSIS1664_web** folder.
- 1.4** Download the **Pr3_StudentFiles_2025.zip** file from the "Activities & Assignments" page of Unit 2 on Blackboard and unzip the folder on your computer.

- 1.5 Copy all the files and folders located inside the downloaded ZIP folder and paste it inside your **CSIS1664_web/Practical3** folder.
- 1.6 The **CSIS1664_web** folder on your computer should now look identical to **Figure 1**.

Figure 1 – File and Folder structure on your computer*

*Please note that your icons might look different.

For this assignment you should only work on the `myindex.html` file and the files that are located inside the **Practical3** folder.

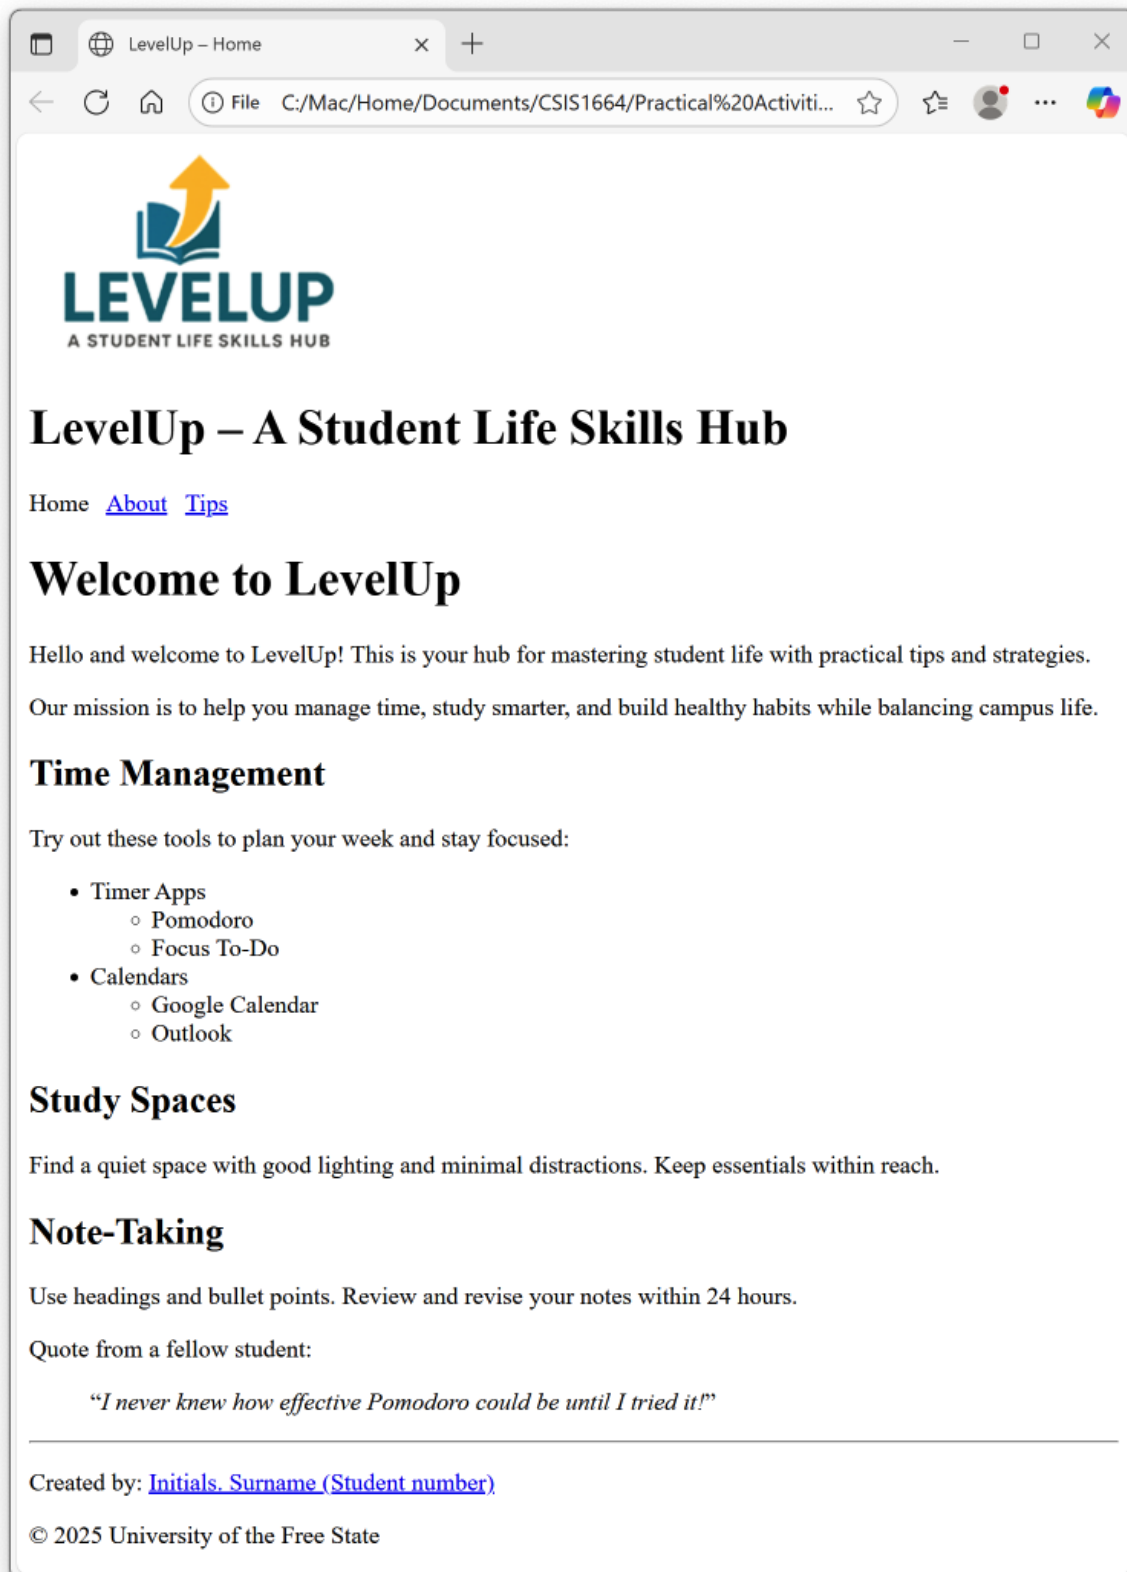

Step 2: Complete the home page – Filename: <code>Practical3/index.html</code>
--

Update the LevelUp home page (see **Figure 2**):

- 2.1 Add your personal details in the provided comments.
- 2.2 Add HTML semantics to structure the page so it contains a header, a navigation section, a main content area, and a footer.

Inside the **main** content, include three named **sections**: "time-management", "study-spaces", and "note-taking".

Note: There are comments in the markup that indicate where each of these structural elements should start.
- 2.3 Inside the "time-management" **section**, add the HTML markup to create the nested list structure.
- 2.4 Inside the **footer**, replace the "Initials. Surname (Student number)" text with your own details. This text should be a hyperlink back to your personal index page (`myindex.html`).

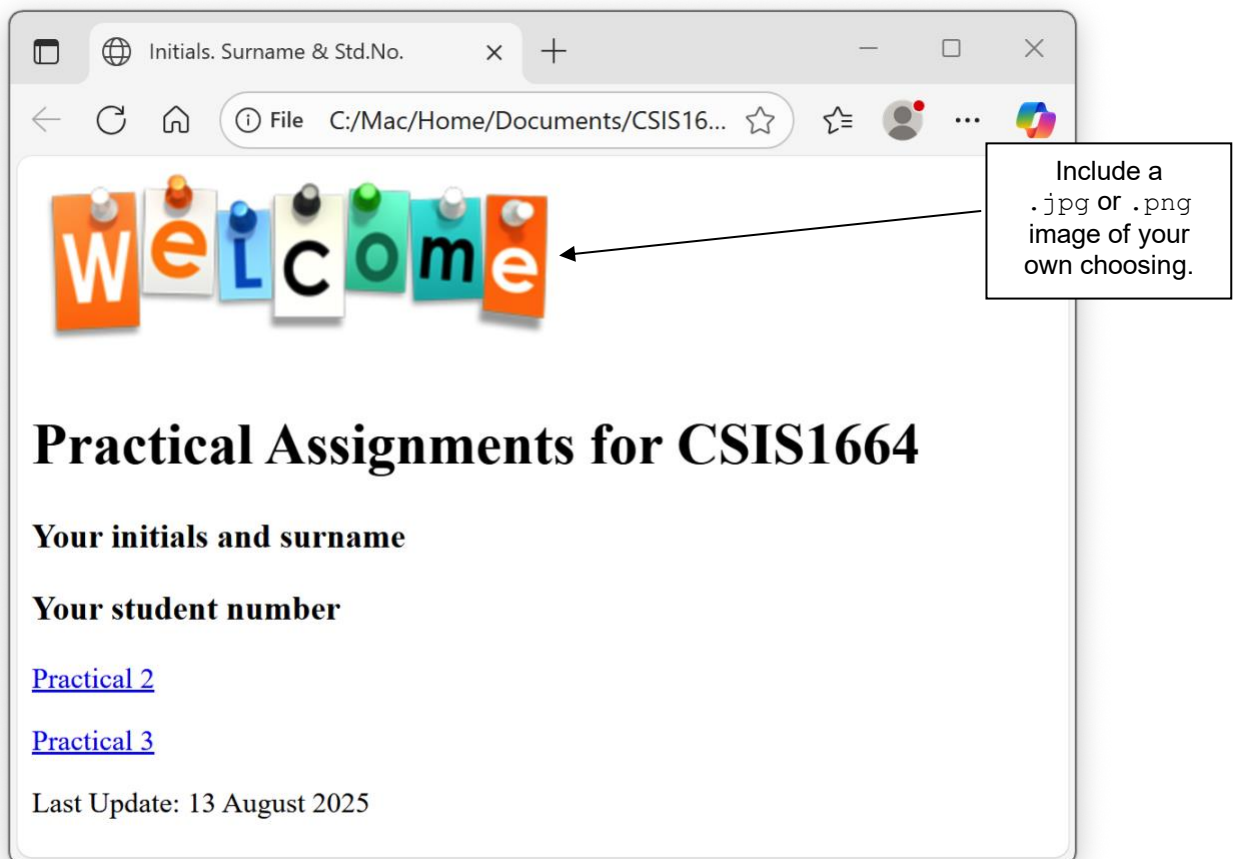

Figure 2 – LevelUp home page (index.html)

Step 3: Update your Personal Index page – Filename: `myindex.html`

Make the following changes your personal index page (`myindex.html`) so that it will look similar to the screen capture in **Figure 3**:

- 3.1** Add the necessary markup to display any small image (`.jpg` or `.png` file) at the top of your index page (before the "Practical Assignments for CSIS1664" text).
 - The file size of the image must be smaller than 1Mb.
 - The display dimensions of the image should not be larger than 300 x 300px.
 - The image file should be located in the **images** folder of your **CSIS1664_web** folder (see **Step 1**).
- 3.2** Add HTML semantics to structure the page so it includes a header, main content, and a footer. **Note:** Only the image and the "Practical Assignments for CSIS1664" text should be located inside the header. The "Last Update ..." paragraph should be located inside the footer.
- 3.3** Add a link for Practical 3 – that links to the home page of the LevelUp website.
- 3.4** Update the "Last Update" date to display today's date.

Step 5: Checklist

Use the following checklist to make sure that you have completed everything:

- ✓ My file and directory structure looks exactly as indicated in **Figure 1**.
- ✓ There are no spaces in any of my file or folder names.
- ✓ The home page of the LevelUp website was updated according to the specifications and looks identical to **Figure 2**.
- ✓ My personal index page is updated and contains a link to Practical 3.
- ✓ All hyperlinks that I have added are working.
- ✓ My personal details are included as comments inside all HTML files.

Step 6: Submit your assignment files

- 6.1** Create a ZIP folder of your entire **CSIS1664_web_YourDetails** folder.
 - 6.2** Submit this ZIP folder on the "Submit Practical 3" page on Blackboard before the submission deadline. (**Note:** You will find the submission link on the "Activities & Assignments" page of Unit 2.)
-
