Tutorial 1 (Basic HTML Page)

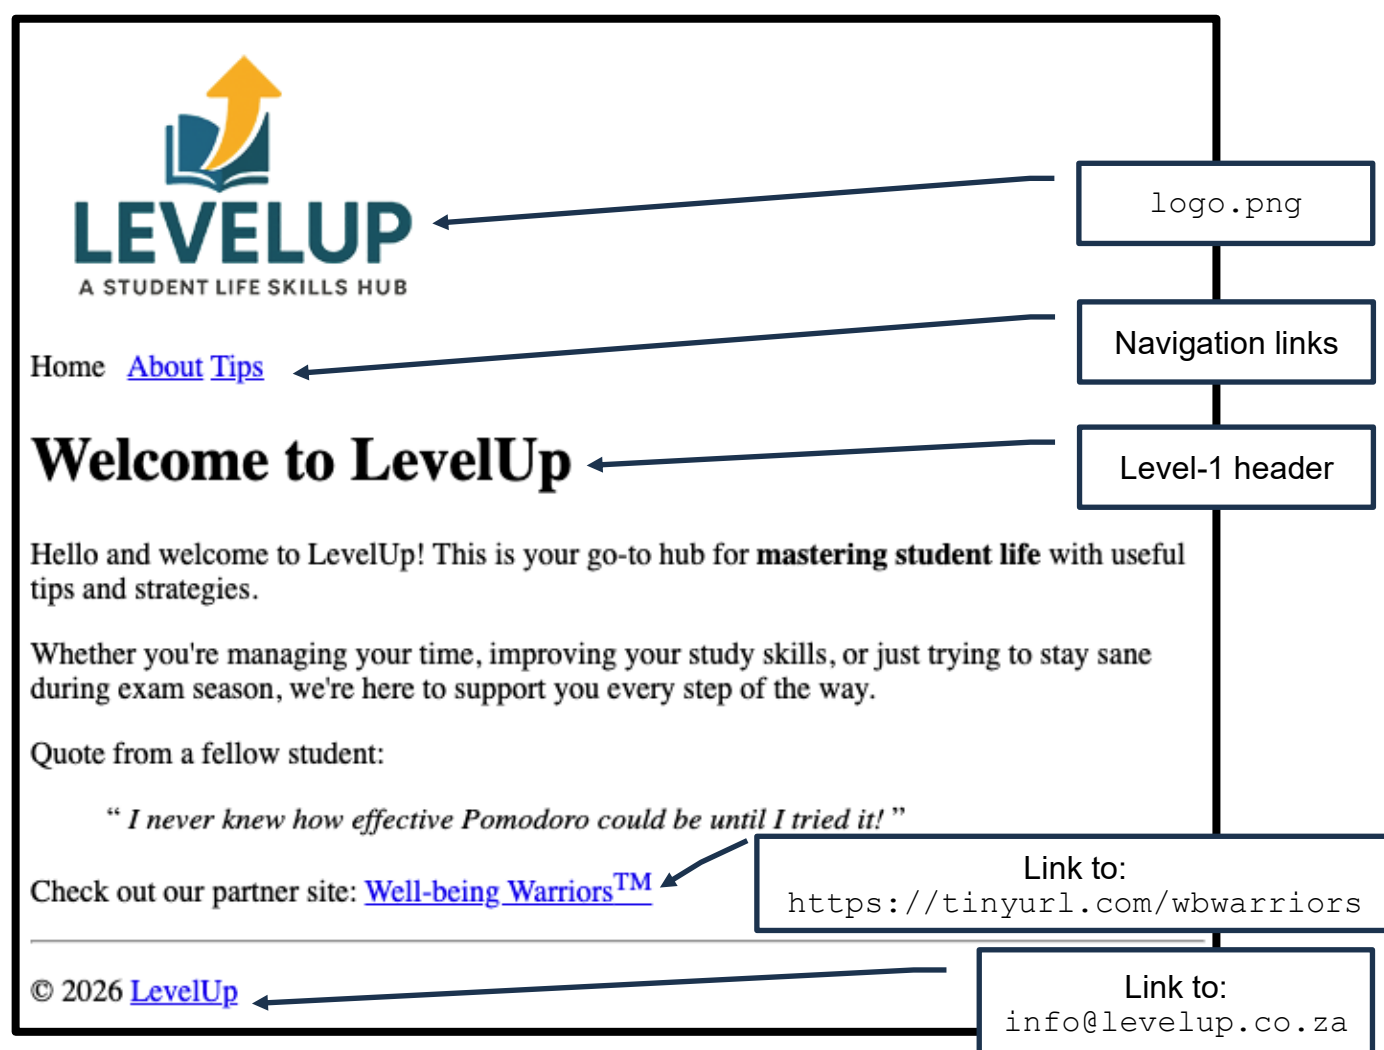

Assume that the directory and file structure depicted in **Figure 1** will be used for the **LevelUp** website.

Figure 1 – Directory and File structure for "LevelUp" website

Create the Home Page (`index.html`) of the **LevelUp** website so that the resulting page will look exactly as indicated in **Figure 2**.

Figure 2 – LevelUp home page: `index.html`

Also note the following:

- The provided `home.txt` file contains all the text content for this page.
(**Tip:** Start by coping the provided text into the `<body>` section of your own HTML template file.)
 - "Home" (referring to the current page) should not be a hyperlink on this page.
 - "About" should link to `about.html`
 - "Tips" should link to `tips.html`
 - In the quotation, only the text should be displayed in italics. The quotation marks should not be italicised.
-
